1 Quiz 1

1. Jelaskan dengan detail tentang mekanisme dalam pelaksanaan proyek. Sertakan bagan untuk memvisualisasikan mekanisme pelaksanaan tersebut.

- The project starts from an idea from a Project Owner
- The Project Owner will make a Project Proposal to find sponsors for the project
- If the project proposal is approved, the Project Owner will make a Project Charter
- The Project Owner will find a Project Manager to manage the project
- The Developer team will be formed by the Project Manager
- The Project Manager will make a Project Implementation Plan
- Each members of the Developer team will be assigned to their respective tasks
- The project manager will monitor the progress of the project and report it to the Project Owner
- When the project is in the execution phase, it will be monitored by the Quality Assurance team
- If the project is finished, the Project Manager will make a report

-
2. Jelaskan tentang proses pelaksanaan manajemen proyek. Jelaskan pula input dan output dari tiap proses tersebut!

- **Initialisation Phase**

- Input: Ideas from the Project Owner
- Output: Project Proposal, Project Charter

- **Planning Phase**

- Input: Project Charter
- Output: Project Implementation Plan, Work Breakdown Structure, Gantt Chart, Project Schedule, etc

- **Execution Phase**

- Input: Project Implementation Plan, Work Breakdown Structure, Gantt Chart, Project Schedule, etc
- Output: Project Report, The Project itself

- **Monitoring and Controlling Phase**

- Input: Project Report, The Project itself
- Output: Quality Assurance Report

- **Closing Phase**

- Input: Quality Assurance Report
- Output: Project Report

3. Apa kaitannya antara pelaksanaan manajemen proyek dengan 9 knowledge areas of project management?

The correlation between the implementation of project management and the 9 knowledge areas of project management is that the implementation of project management is the process of managing the 9 knowledge areas of project management. The 9 knowledge areas of project management is what the project manager needs to manage in order to successfully complete the project.
